- HOME CONTROL SYSTEMS
- SECURITY
- LIGHTING CONTROL
- WHOLE HOME AUDIO
- ENERGY MANAGEMENT

**Sell more homes and set yourself apart from the competition by offering your clients home technology from the premier manufacturer of home control systems.**

Since 1985 HAI has been providing comfort, convenience, and safety for homeowners around the world. Our multi-award winning product line includes home control systems and products to provide lighting control, whole home audio, and energy management.

### HOME CONTROL SYSTEMS

An HAI home control system coordinates all of the systems in a home to talk to each other making the home more comfortable, secure, and convenient. HAI offers two families of controllers to choose from:

**Omni** controllers feature built-in UL Listed security and fire systems, lighting control, temperature control and audio control with telephone and Internet connectivity options. Three models ensure the right size for any home and budget.

**Lumina** controllers are sophisticated lighting control systems that are affordable and easy to install. If desired, they can tie into an existing security system. Numerous options and accessories from HAI allow Lumina to grow into complete home automation systems. There are two models in the Lumina family.

### WHOLE HOME AUDIO

Hi-Fi by HAI is a high fidelity, central Whole Home Audio system that is unique because it is built-in. The main amplifier is mounted in a closet or structured wiring cabinet. This means no audio rack is required so you can offer clients an affordable, sophisticated whole home music solution without buying expensive or proprietary source equipment. Equipment such as a CD player, iPod™, satellite radio, etc. are then plugged in to Remote Input Modules in each room to be enjoyed and shared throughout the house. Can be used as a standalone system or integrated with an HAI Home Control System.

### ENERGY MANAGEMENT

HAI has a full line of programmable communicating thermostats, including the new Omnistat-Z line with built-in Z-Wave™ capability for wireless communication, temperature/humidity sensors, and accessories.

### LIGHTING CONTROL

With HAI Lighting Control you get all the benefits of a sophisticated lighting control system that is affordable and easy to install.

### INTERFACE OPTIONS

HAI offers many options to access and control either an Omni or Lumina system. We offer a variety of affordable and attractive Touchscreens, consoles, keypads, telephone access, and software interfaces for Internet control. HAI also integrates with Windows Media Centers.

Contact HAI or one of our Distribution Partners or Dealers for information regarding our Builder Partner Program to start selling more homes faster today.
